

EZ-LINK

CROSS BORDER CONTROL

How can **Farrow help?**

Farrow's expertise draws on over 100 years of experience to accelerate the importation of your goods across borders. When you hire us as your valued broker partner, you gain access to a network of offices across North America and affiliates around the globe, all focused on making sure your shipments are delivered accurately, and on time.

Customs

Logistics

System Solutions

Global Service

EZ-LINK interfaces directly with U.S. Customs Automated Commercial Environment (ACE) Truck eManifest Solution and U.S. FDA prior notice reporting

- **Dynamic, customizable interface**

Customize user screens based on your own preferences and setup.

- **Little or no additional data entry or calculation required for FDA or tariff classification reporting**

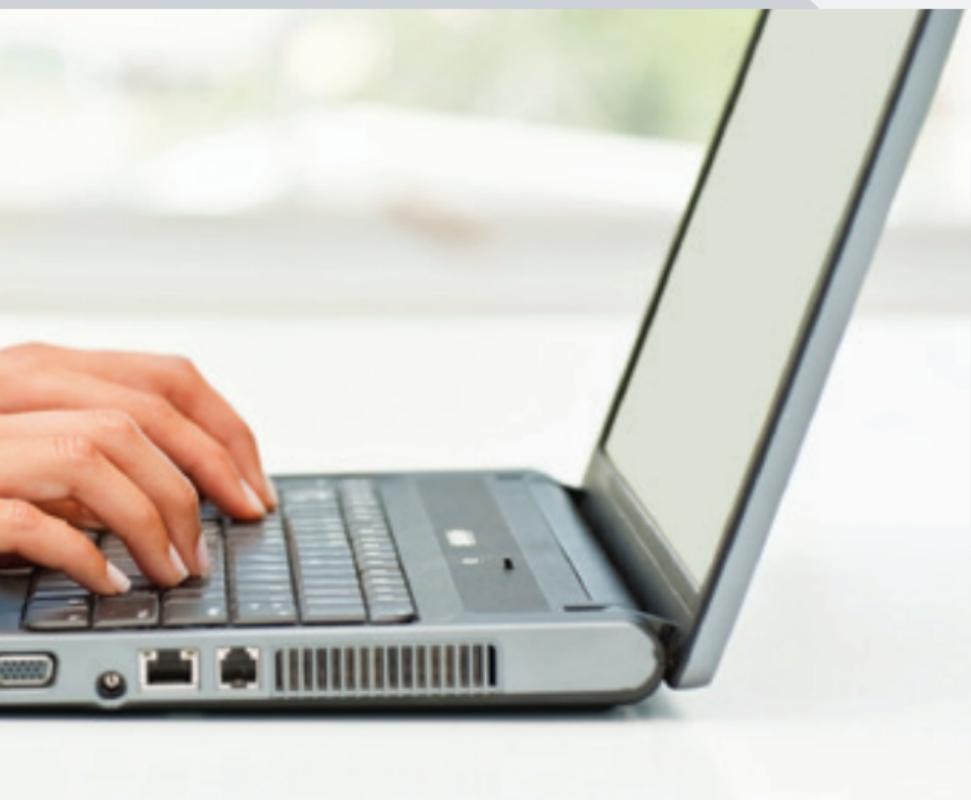

Information is sent to U.S. Customs and, where applicable, to U.S. FDA, and other Participating Governmental Agencies (PGAs) such as the FCC and DOT.

- **Customizable, easy-to-use “dashboard” presents current activity and real-time status updates**

Real-time electronic clearance reporting from U.S. Customs or FDA automated systems ensures timely status updates.

- **EDI abilities with one standard output to U.S. Customs automated system**

Allows importer to automatically send email to any designated parties, including invoicing features.

- **Allow your customers to access EZ-LINK and input their own data**

Speeds up processing time with minimized data input errors.

- **'Quick function keys' allow easy access to commonly-used functions**

Perform tasks such as transmit to broker, go to invoice, update existing file, etc., at the touch of a key.

- **Multilingual data field headings**

English, French or Spanish.

EZ-LINK will give you compliance peace of mind when transmitting commercial invoice information and/or FDA prior notice information, either separately or combined prior to arrival of your cargo at the U.S. border.
