

Ground Transportation

Farrow Express offers quick and reliable domestic and cross-border ground transportation services in both the U.S. and Canada.

Providing savings, flexibility, and improved delivery reliability, Farrow offers both asset-based and non-asset-based services to help you find the best solution for efficient service delivery – reducing both paperwork and costs.

Farrow's ground transportation solutions get your shipments where they need to be, on time and reliably. Farrow can handle single shipments or manage your entire ground network while maintaining performance, security, technology, and equipment standards to give you peace of mind.

With Farrow's Transportation Management System clients can book shipments, access advanced routing and scheduling capabilities, view real-time statuses with visibility to tech-tracked loads, review Proof of Delivery (PODs), and access invoices once a shipment is billed.

In addition to transportation management, Farrow integrates customs brokerage services for U.S. and Canadian clients to create seamless cross border shipping solutions. Our one-stop shopping approach can help reduce your inventory and storage costs, improve service delivery, and allow you to schedule production more precisely.
