Farrow Shipment Tracking

Drivers carrying loads cleared by Farrow can check their shipment status from the comfort of their cabs through a user-friendly mobile app that enables them to register for **PARS** (Canadian imports) or **PAPS** (U.S. imports) shipment notifications to track shipments in both directions across the Canada-U.S. border.

This app was collaboratively designed and developed by business partners and Farrow's IT professionals.

Key Features

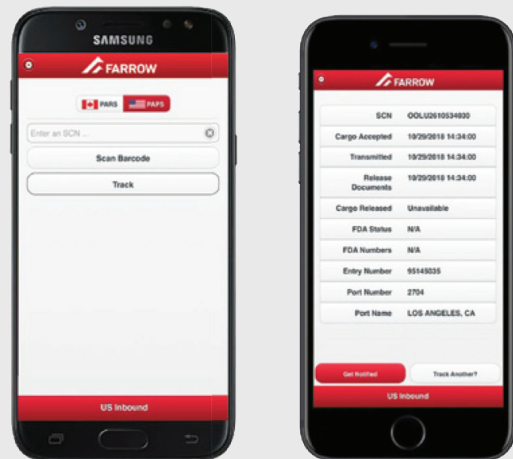

- **Barcode Scanning:** Users can scan their shipment documents with their phone camera and the tracking details will be auto filled
- **Select Preferred Communication:** Choose to receive notifications either by voicemail or email
- **Request Specific Updates:** Choose when you want to be notified, based on the multiple stages of a transaction (e.g. when PARS "accepted" or PARS "released")

The Farrow Tracker App incorporates the following features:

1. PARS Tracking
2. PAPS Tracking
3. Shipment Notifications
4. Bar Code Scanning
5. User Settings

By downloading this one app, drivers can see northbound or southbound shipments and register to receive notices as alerts are sent. This app also provides the ability to monitor release for hot shipments remotely, in order to keep up-to-date.

Don't want to download an app?

Check the status of your shipment from any device using Farrow's website! All that is needed is a device or computer with an internet connection and a web browser, and real-time shipment statuses are available to you.

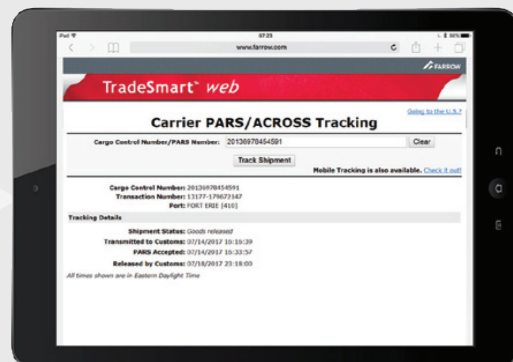

This platform is an extension of the PARS/ACROSS and PAPS tracking applications accessible from any web-enabled device.
